

Wilmington Maternal-Fetal Medicine

VISITOR AND CHILD POLICY

Wilmington Maternal-Fetal Medicine is dedicated to providing the highest quality of care to each family. So our health care providers can give each patient the best possible care, we have instituted the following policies:

- Please understand that we are a high risk OB office. The majority of our patients receive good news and have a healthy pregnancy. But unfortunately, a few patients may be dealing with sensitive issues.
- Due to the sensitive nature of our practice we cannot allow children under the age of 16 in the office. Please make child care arrangements before your visit.
- The technicians performing the ultrasound have a highly detailed job to do and need to be able to focus on the baby. Therefore, no more than two adults will be able to join the patient in the room during the visit.
- Unfortunately, videotaping or camera picture taking is not allowed. However, each patient will be given a still photo of her baby if desired.

Thank you very much for helping our staff and physicians continue to provide the highest quality maternal fetal care.
