

# Help us learn more about the impact of COVID-19 on mothers and newborns.

**Study Registry: Center for Innovative TRIals in ChildREN and Adults (TRIDENT) - COVID-19**

## Why is this study registry important?

We do not know the long-term impact of COVID-19 on women and their newborns. The information we gather through this registry will help us learn more about COVID-19 and can improve future therapies for pregnant women and their children.

## What will happen if I decide to enroll in this registry?

- You will enroll by going to the website below and entering the verification code or scanning the QR code. The website will provide more information and ask you to provide your consent to be part of the registry.
- You will be contacted by the Registry Study Team via electronic communication or phone twice—once when your baby is 6 months and once when he or she is 1 year old.
- You will complete questionnaires about your child's medical status and release results from your doctor and your child's pediatrician.
